Statewide Pedestrian and Bicycle Transportation Plan Update

NHDOT Seeking Public Input on the existing network

The New Hampshire Department of Transportation (NHDOT) is working to improve and expand the walking and bicycling network in the Granite State and is asking the public to help shape a Statewide Pedestrian and Bicycle Transportation Plan. The Plan will provide direction on expanding access and safety for pedestrian and bicycle use of the State's transportation network and consider the economic benefits of pedestrian and bicycle access.

As part of the Plan's effort to identify the existing pedestrian and bicycle network and to fill gaps in pedestrian and bicycle access, the Department has a Project website where the public can participate in an online survey and contribute to an interactive input map available at www.nhpedbikeplan.com.

Through October 9, 2019, the interactive map will allow users to identify challenging corridors for walking and bicycling, and suggest locations for new or improved infrastructure designed to enhance access and safety for walking and bicycling.
